The tracking system can monitor the vehicle and driver's actions so parents are assured of safety. The trackers can also give up-to-the-minute information on the bus's location.

When schools use Thinture GPS Tracker, parents can check that their child got on the bus at their stop and got to school on time. Parents can also opt for regular SMS or Email to make sure that, their child travels safely.

information in parents' hands also means fewer phone calls to schools, relieving the strain on School staff in the morning when the day is most hectic.

SENSOR

" A GPS tracking system will improve school bus efficiency and provide parents information in real-time of their child's whereabouts. A modern system can give updates should there be any delay in the route. Access to information will be a relief for parents who are waiting for their children to come home"

Using GPS systems to track their school vehicles can mean less wasted funds on fuel and maintenance costs. it will improve route planning, which will reduce wasted time and miles driven, which all adds up to savings for the school.
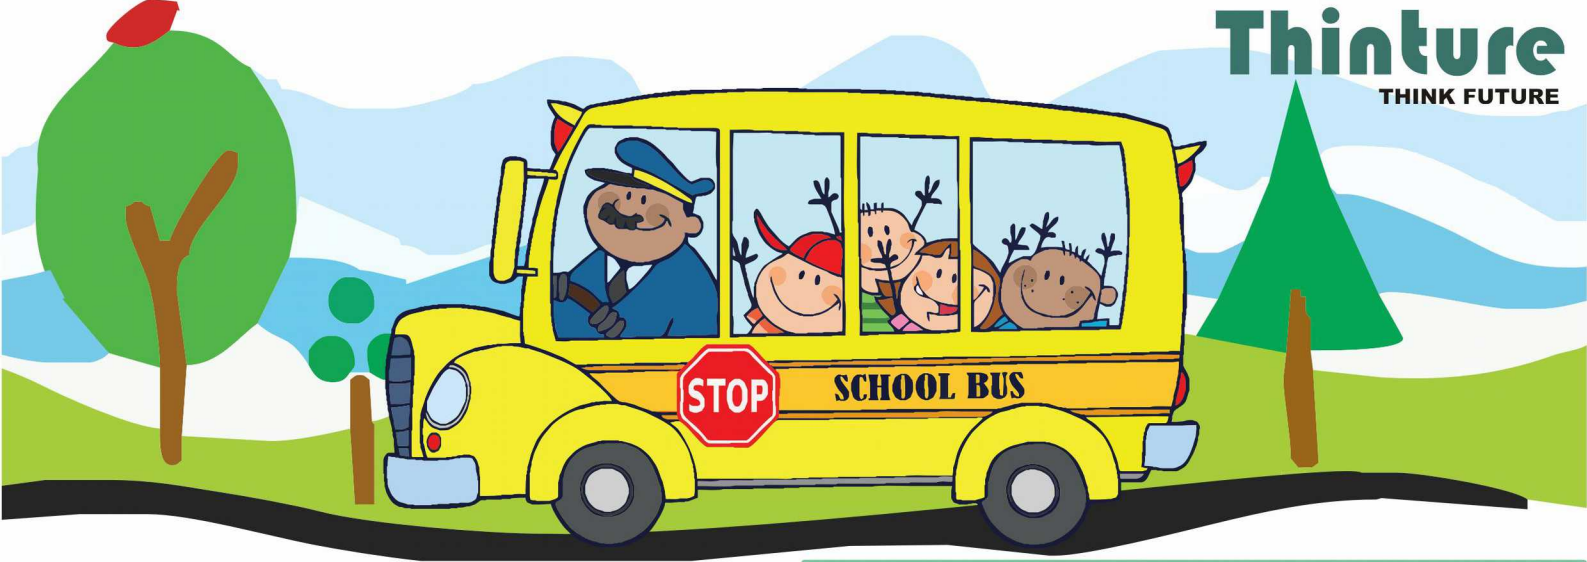

If your school is not yet using GPS tracking system, you are missing out on these great benefits. With a system like **Thinture**, you can improve the safety and efficiency of school buses and save costs too. You just need to install the device on your vehicle.

Introduction - Thinture GPS Tracker

Thinture is an award winning exporter of road safety products for many years. Thinture GPS Tracking devices are designed, developed and manufactured in India. Currently, Thinture has a state of the art manufacturing facility to manufacture bulk quantities of GPS tracker at a very competitive price. The software platform is also completely developed in-house. Apart from real time tracking, It has various inputs to check the status of the vehicle by connecting to Ignition, Seat belt, speed sensor etc. SMS alert , Call and Locate (CAL) and vehicle running reports are the most important features.

STUDENT MANAGEMENT SYSTEM
